

Permanent Solution for Unwanted Hair

www.bioxet.com

BIOXET - SIMPLE TO USE-

3 Steps, in just a few minutes

Step 1: Ensure that all unwanted hair from the area to be treated is removed from the roots in the usual way (e.g. waxing, sugaring, plucking, threading, mechanical devices). Wash and dry the area to be treated thoroughly before continuing with step 2.

Step 2: Apply the cream liberally to the area to be treated, massaging against the direction of hair growth.

Step 3: Apply BIOXET nightly to the treated area, massaging against the direction of hair growth, until hair has reached a sufficient length for repeat removal

Manufactured by PDI Cosmetics, Ltd., 10000 Markham Road, Markham, Ontario, Canada L3R 9V7

	Melanin value	Erythem value
Initial	494	569
24 hours	492	571
P value	<0.05	<0.05

BIOXET's innovation

Bioxet's innovation By researching the histological structure and features of the skin, BIOXET's Research and Development has succeeded in innovating a formula that acts perfectly as a hair-reducing cream.

BIOXET

- Reduces and weakens unwanted hair.
- Increases skin's moisture and softness.
- Contains herbal active ingredients.
- Is suitable for all types of skin and body hair.
- Is dermatologically safe.

Mechanism of action

- BIOXET inhibits cell division in hair roots and reduces proliferation of keratinocytes.
- By using BIOXET, the actively growing hair follicles (those in the anagen phase) rapidly enter the resting (telogen) phase)

Conclusion

Seen results, at the end of 3 months

46%reducing in number of hair
 43%reducing in the hair length
 30% hair thinning
 3%increase of skin's moisture

With each application hair growth is dramatically reduced and thinned.
